1.0 Introduction

The death of a student is an upsetting event for the Technological University of the Shannon: Midlands Midwest community. It is important the Technological University reacts in a manner that recognises the loss of a member of the student body and supports those most affected by the death.

This protocol supports the diverse situations that surround the death of a student thus ensuring that TUS can respond sensitively, quickly, and appropriately to that death at discreet timelines. It recognises that the death of a student may be formally marked by a funeral or other types of observances that are in keeping with the cultural and religious beliefs of the deceased and their family.

The primary consideration always must be respect for the student who has died, their family, and their wishes.

This means that the information communicated should be limited to that which is necessary, appropriate, and complies with all relevant governing legislation (example: Data Protection, Freedom of Information).

While it is obviously essential that accurate information about the death of a student be communicated immediately to those who need it, it is also essential that this is done with an awareness of the sensitivity of the information and its impact on the recipients.

2.0 Immediate Actions

2.1 The Designated Central Contact Offices are the Chaplaincy / Pastoral Care Office and the Office of the Vice President Student Education and Experience.

2.2 Any member of staff of the Technological University, or student member, who becomes aware of the death of a student off-campus, should inform as soon as possible one of the designated central contact offices above.

In the case of an on-campus student death, the Critical Incident Management Plan should be implemented.

2.3 The Designated Central Contact Offices will coordinate and check if the student is a registered student, (registered on the Student Record Management System), and confirm the report of the death with an appropriate contact point (e.g., parish, police, funeral director).

2.4 In the event of the death of an international student whilst completing their studies in TUS, the Technological University will make contact and liaise with the relevant Embassy of the country of the deceased to coordinate and support the

communication of the death of a foreign national whilst studying abroad. TUS will be guided on this aspect of the protocol as appropriate by the Department of Foreign Affairs.

- 2.5 The Chaplaincy / Pastoral Care Office will initiate contact on behalf of TUS with the family of the deceased, convey condolences on behalf of the Technological University and ascertain the initial wishes of the family, (e.g., privacy, outline of arrangements). All official contact between TUS and the family will be conducted by the Designated Central Contact Office(s).

It is important that TUS only releases the information in relation to the deceased that the family want to release.

The primary consideration always must be respect for the student who has died and their family wishes.

The facts presented must be consistent with the wishes of the bereaved family and must not disclose any personal information of the deceased or related parties that would be in breach of relevant governing legislation. The communication may be in person, or via an email correspondence, if the death occurs outside of the normal on-campus activity. The face-to-face visit by the Head of Department, or their nominee, to the lecture theatre/classroom can be accompanied by the Chaplain/Pastoral Care Co-
