

Assessment, Integrity and
Artificial Intelligence:
is it finally time to resolve
some *enduring issues* in
higher education?

Technology & Assessment: troubling relationship

Date: _____ Page: _____
Essay Writing

your essay before you start to write.

We gifted academic integrity to a machine,
long before ChatGPT

We lost sight of what matters about assessment, *long before ChatGPT*

How we respond to ChatGPT and how we nurture authentic assessment,
rests on values and principles that we should have attended to,
long before ChatGPT

There has been a rich research literature on the need for more diverse, authentic and meaningful assessments for decades,
long before ChatGPT

Why did it take a machine, robot or computer (AI) to get people's attention about assessment?

The conflation of poor referencing skills and plagiarism – as the deliberate intention to deceive – has been disastrous for academic integrity, academic writing and authentic assessment.

Understanding of the literature
Critical Analysis
Clear writing and presentation
Good referencing skills
Clear building of an original argument

We should not use technology to absolve us of responsibility to teach the academic craft – and to assess it in honest, authentic and genuine ways.

“the passive acceptance
of what is merely the
case”

Adorno (2001) Page 121

Our Values

We operate in a responsive manner where integrity and excellence underpin all we do. We are honest, fair and ethical through our words and actions.

Nancy Fraser, 2003, on Critical Theory

“peculiar dialectic of
immanence and transcendence”

“one foot in society and one looking
beyond”

Martin Jay, 1996, on Frankfurt School

Purpose increasingly to think the
unthinkable

Artificial Intelligence is a threat to Academic Integrity

Artificial Intelligence is the new reality we have to accept – and it might be good

Artificial Intelligence is being driven by self-interested hype that must be challenged

Resisting and reimagining Artificial Intelligence

Educators can take inspiration from growing efforts to resist the current hype around AI

FUTURE OF WORK IN EDUCATION

EQUITY AND INCLUSION

My take:

Follow the money

Western-centric

Fueling discrimination

Perpetuating stereotypes

Deeply rooted in
misogyny

Barrier to decolonisation

Those “*enduring issues*”...

What is academic work?

Academic work is engaging
with the minds of others

What counts as achievement
when we assess?

Learning Outcomes

There is NO how
much.

The student will be able to:

Critically analyse research methods literature

Explain the difference between nuclear fusion and nuclear fission

Successfully undertake an invasive biopsy procedure

Demonstrate critical understanding of the health and safety in an industrial context

Construct a working design prototype for a robot

Our professional
commitment is to criterion-
based marking.

≠

Reflecting on the pressures to give in to pseudo norm-based marking

We make choices when we assess

Understanding those choices will be even more important in an age of Generative AI

We make choices

Students learn better in low stakes assessment environments

There is an assumption that high stakes assessment environments do more to ensure academic integrity

LEARNING

INTEGRITY

INTEGRITY

LEARNING

LEARNING

INTEGRITY

INTEGRITY

LEARNING

Not suggesting:

- a learning:integrity binary
- a necessary trade-off between learning and integrity

Am stressing:

- we currently do make choices
- those choices are not inevitable, natural nor should they be uncontested

Consider knowledge holistically

Name	Research Paper Rubric 2	
Description	Research Paper Rubric 2	
Rubric Detail	Levels of Achievement	
Criteria	Does Not Meet Expectations	Approaches Expectations
Development Originality Weight 5.00%	0 % Thesis statement or research question is title or absent.	25 % Thesis statement or research question is overly general but makes an arguable claim.
Development Thesis Statement Support Weight 10.00%	0 % Thesis statement or research question is unevenly or illogically supported and citations are less than apt.	25 % Thesis statement or research question is supported by some evidence with citations.
Development Scholarly Conversation Weight 8.00%	0 % Does not present an adequate array of scholarly ideas.	25 % Does not engage successfully with scholarly conversation in the subject area.
Critical Thinking Content Discourse Weight 9.00%	0 % Does not consider the context or considers it in an ego- or socio-centric way.	25 % Considers the context and assumptions of the scholarly discourse in a limited way.
Critical Thinking Integration of Ideas Weight 9.00%	0 % Does not consider multiple points of view.	25 % Considers multiple viewpoints and ideas tentatively or overstates the conflict.
Critical Thinking Conclusions Weight 9.00%	0 % Fails to identify conclusions or conclusions presented are simplistic or absolute.	25 % Conclusions only loosely follow from arguments and evidence presented.
Organization Facilitates Understanding Weight 5.00%	0 % Shows little attempt to guide the reader through the document.	25 % Facilitates understanding but has occasional lapses.
Organization Order of Ideas Weight 5.00%	0 % Order of ideas in paragraphs is usually difficult to follow.	25 % Order of ideas in paragraphs is apparent but occasionally difficult to follow.
Language Fluency Weight 5.00%	0 % Incorrect word choice or syntax often interferes with meaning.	25 % Incorrect word choice or syntax often interferes with meaning.
Language Voice Weight 5.00%	0 % Voice fluctuates repeatedly.	25 % Lapses in tone and voice are distracting.
Mechanics Grammar Surface Features Weight 7.00%	0 % Grammar, punctuation, and spelling errors are prominent.	25 % Some grammar, punctuation, or spelling errors throughout.
Mechanics APA Weight 5.00%	0 % Little or no attempt to follow APA conventions.	25 % Some APA conventions are followed.

Development Thesis Statement Support
Weight 10.00%

0 %
Thesis statement or research question is unevenly or illogically supported and citations are less than apt.

25 %
Thesis statement or research question is supported by some evidence with citations.

75 %
Thesis statement or research question is supported by evidence and appropriate citations.

Development Scholarly Conversation
Weight 8.00%

0 %
Does not present an adequate array of scholarly ideas.

25 %
Does not engage successfully with scholarly conversation in the subject area.

75 %
Engages in scholarly conversation through inter-textual means.

Critical Thinking Content Discourse
Weight 9.00%

0 %
Does not consider the context or considers it in an ego- or socio-centric way.

25 %
Considers the context and assumptions of the scholarly discourse in a limited way.

75 %
Examines the context and explores the assumptions of the scholarly discourse.

Critical Thinking Integration of Ideas
Weight 9.00%

0 %
Does not consider multiple points of view.

25 %
Considers multiple viewpoints and ideas tentatively or overstates the conflict.

75 %
Integrates multiple viewpoints and compares ideas or perspectives.

Critical Thinking Conclusions
Weight 9.00%

0 %
Fails to identify conclusions or conclusions presented are simplistic or absolute.

25 %
Conclusions only loosely follow from arguments and evidence presented.

75 %
Conclusions are logical based on arguments and evidence presented.

75 %
APA conventions are usually followed.

100 %
Follows APA conventions carefully.

Painting by John Glover

“the passive acceptance of what is merely the case”

Our Values

We operate in a responsive manner where integrity and excellence underpin all we do. We are honest, fair and ethical through our words and actions.

Artificial Intelligence IS shaped by humans, and they may not be benign or neutral – but they could be ethical and transformative

*Addressing those
"enduring problems"
in an age of
Generative AI*

Our Values

We operate in a responsive manner where integrity and excellence underpin all we do. We are honest, fair and ethical through our words and actions.

We should not use technology to absolve us of responsibility to teach the academic craft – and to assess it in honest, authentic and genuine ways.

Academic work involves engaging with the minds of others.

Our professional responsibility is to criterion-based marking

We should be honest about the choices we make when we decide on grading systems

We assess for the world beyond assessment.

Assessment should be approached holistically, as should knowledge.
